

# MONITOR- SETTINGS

The following instructions will outline how to confirm and make changes to your settings on your Denago City 1.0 eBike

As you know the monitor is connected in a number of ways to your eBike. It interfaces with the HMI to adjust your PAS levels, advises if you have a problem with your brakes and also tracks a number of great features. Like speed, distance, MAX speed, battery level etc. The following will show you how to confirm and make needed adjustments

**STEP 1** Press and hold **M (MODE)** Button until screen turns

**STEP 2** Press and hold **+ - (UP/Down)**

Simultaneously for 2-4 seconds until screen flashes and goes to setting interface. You have 4 settings

Use the **+ -** to toggle thru each screen and the **M** to move to the next setting

**1-inCH-** wheel size setting- Your Denago City 1.0 is **27.5**

**3- bl** -this is screen brightness. You have 3 levels

**2-LS-** Limited Speed. This is your max speed setting. See Following Page.

**4- unit** -this is the speed and distance setting MPH or KPH

**Please perform a safety check and make sure to adjust your MAX speed to a comfortable and confident speed. Enjoy the Ride**

# Pedal Assist Speed Adjustments

The following instructions will outline how you set the MAX Speed in Pedal Assist (PAS) level 5. Once this is set it will adjust each of the other levels by a preset percentage

**STEP 0** Locate the HMI- Human Machine Interface

**STEP 1** Press MODE Button to engage screen

**STEP 2** Press **+** **-** (UP/Down)

Simultaneously for 2-4 seconds until screen flashes and goes to setting interface

**STEP 3**- First screen to pop up is wheel size- **PRESS MODE** to go to next screen

**STEP 4**- LIMIT SPEED mode- (LS) this is where you can adjust MAX speed- Use the

**+** **-** (UP/Down) to adjust MAX limit-

Your range is 28 – 11 mph as the Lowest Limit

**STEP 5**- Press **M** (MODE) for 2seconds to return to main screen.

You are ready to ride

Please let us know if you have any comments and/or follow up questions!
